Plum Metrics in EDS

The institute’s EDS web discovery service displays Plum Metrics data with search results.

Plum Metrics are metrics and qualitative data which complement traditional, citation-based metrics and are derived from web-based activity such as social media reflecting the impact of scholarly research.

When a set of results are displayed from an EDS search an Plum Metrics badge will be displayed where applicable, e.g.

The badge can be expanded to give more detailed information:
The ‘See details’ link will give a full summary:

and provides publication details and an article summary.
